

# *Cargo Tarp Tie Down System*

## *Application of EZ Grabbit Tarp Tie Down and Keeper Accessory.*

### General Specifications

**EZ Grabbit Tarp Tie Down**

**Keeper**

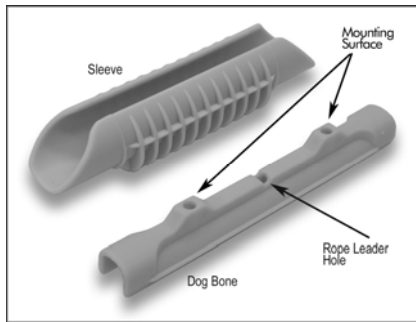

**Trailer Tent - Tarp Held by EZ Grabbits**

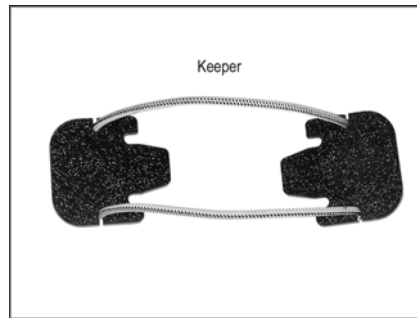

**Surface Mounted EZ Grabbits with Keepers**

# The EZ Grabbit Keeper

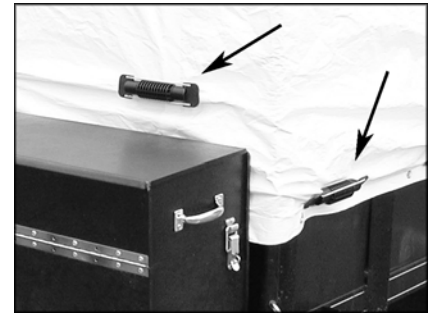

The EZ Grabbit has two parts: The Dog Bone and Sleeve. The tarp is wrapped around the Dog Bone and the Sleeve is slid into place to engage. Also see EZ Grabbit instructions for both rope leader and surface mount applications. The Keeper adds an extra level of engagement by keeping the Dog Bone and Sleeve engaged regardless of circumstances or conditions. The Keeper comprises two engagement tabs connected by shock cord. The Keeper is stretched and inset into the ends of the EZ Grabbit between the Dog Bone and Sleeve. This keeps the Dog Bone and Sleeve engaged.

## EZ Grabbit with Keeper

Shown here without material. The Keeper maintains engagement of the Dog Bone and Sleeve via the shock cord by pulling the engagement tabs into the ends of the EZ Grabbit.
